Step 1
Developmental Journal
A summary of development during Step 1

Personal, social and emotional development
Close, affectionate relationships with parents and other members of the family are just as important for babies as their basic need for warmth, food and physical care. Feeling emotionally secure is crucial for development. Responding sensitively to your child helps them feel secure and learn to manage and regulate their own emotional state. These ‘self-regulation’ skills are important, because they help children to calm themselves or settle themselves to sleep.

Cuddling, stroking and massage, are all important ways of comforting, soothing, reassuring and showing love. A few babies are very sensitive to touch, so you need to watch for your baby’s reactions and use touch in a way that’s pleasing to both of you. Touch is an important way of communicating, and touch games like ‘pat-a-cake’ can be a good way of playing with babies. Holding your baby in different positions, while you support their head and neck, can also be a fun way of giving them an early experience of using their muscles.

Communication, language and literacy
Babies communicate a lot – they just do it in their own way. They start to use different sorts of cries to tell you whether they’re hungry, tired or uncomfortable and are likely to be especially interested in your face and your voice. Sometimes they’ll even copy your facial expressions and mouth shapes. It’s important to talk with your baby right from the start of life, because they like to watch your face and listen to you. Babies pay particular attention to ‘baby-talk’, when you talk in short simple sentences, using a lively tone of voice and lots of facial expression and gesture. Repeat things, allow enough time and space for your baby to join in, and talk to your baby about what they’re doing and might be thinking – it helps the two of you to develop your relationship and encourages your baby to communicate. This very early communication is the basis from which abilities like reading and writing develop later.

Problem solving, reasoning and numeracy
It may seem as if all that newborn babies do is take food, sleep and cry, but they’re learning and developing skills from the moment they’re born, and beginning to think about what’s going on around them and how what they do has an effect. Even very young babies have a beginning understanding of simple differences in the world, like the difference between one thing and two things.
Developmental Journal
A summary of development during Step 1 continued

Knowledge and understanding of the world
Learning about predictable events helps babies feel secure. Established and regular sleeping, feeding and bathing routines help them predict what’s going to happen next. To avoid difficulties with settling and sleeping later on, it can be helpful to lay babies down when they are awake at least once a day.

Physical development
Children learn through all their senses. It’s good to use touch, vision, hearing, smell and taste in your play together so you can see how your baby responds to different forms of stimulation – for example, look for signs that your baby is hearing different sounds. Babies respond to sound in different ways and it’s fun to look out for this – some get more active, wave their arms about or widen their eyes, while others quieten down and stop what they’re doing.

Creative development
Quite early on, babies begin to control the movements of their arms and legs, and you can help them to gain this control by playing games that involve these movements. They often enjoy music and rhythmic motion as well. In these early months, creativity is about learning that head, arms and legs, hands and feet can be moved in different ways.

Moving on
Babies don’t necessarily master all the things in Step 1 before they start doing things in Step 2. Every child is different and some make progress in one area much more quickly than in others. This applies to all the Steps in this Journal. However, if you have questions you want to ask about this, there’s space for you to note it down – for example, if you feel your child is consistently lagging behind in one area. You can then raise it the next time you meet with someone who can discuss it with you.

Every child is an individual, with their own unique set of needs. If illness or other setbacks slow progress down and your baby seems to forget things they’ve already learned, it doesn’t mean that you’re not doing enough – you can help them to make progress once these other issues have been resolved.

Use this Journal to record the things that your child does that you’d like to remember and celebrate as time goes by. There are blank pages and spaces to write things down and to add photographs, if that’s what you’d like to do. The material is for you to use in whatever way you find most helpful.

Step 2
Developmental Journal
A summary of development during Step 2

Personal, social and emotional development
Babies in Step 2 begin to express a wider range of emotions. They find ways to show you they’re happy or sad, hungry or tired, excited or bored. You can help by responding to all the emotional signals they give – positive and negative. This helps them learn to trust you as a source of affection, comfort and security and to soothe themselves. Some babies settle to sleep more easily at this stage, but many still have unsettled sleeping patterns and wake up in the night. If you would like some help with this, ask someone – for example, your Health Visitor, or GP.

Communication and language
Babies become able to ‘talk’ in a number of different ways. They’re beginning to control their voice and use different sounds to express different things. They start to blow raspberries, to squeal, squeak and grunt, and to chuckle and laugh. They’re often especially interested in watching faces. You can encourage them by imitating and responding to what they do. Most babies love to join in simple ‘conversations’ – you can help by leaving pauses for your baby to use when they reply to you. Learning about taking turns and responding to what you say is important for later communication. Sometimes babies at this stage start to ‘coo’ when you’re playing and ‘talking’ together. The most helpful thing that you can do is to talk to your baby about everything you’re doing together. Using familiar words for regular routines helps them to understand and anticipate events in their world.

Problem solving, reasoning and numeracy
As well as reacting to the different sounds you make, babies are also learning about other sounds and noises. They start to show an interest in familiar sounds in the home and show they’re beginning to understand what they mean – for example, they may learn that running water sometimes means a bath is about to happen, and so they may get excited when they hear this sound.

Making these sorts of connections forms the basis of reasoning about the world. Giving children plenty of opportunities for different experiences is important for this early learning about the world.

This Step links with Early Years Foundation Stage (EYFS) Phase 1
Knowledge and understanding of the world

Another way that babies in Step 2 explore the world is by holding objects to their mouths. They start to suck their thumbs or fingers and they’re likely to start looking around at their surroundings more. You can make what they look at more interesting by using brightly coloured pictures, mobiles and other things to catch their attention.

Continue developing regular feeding and sleeping times to give your baby a sense of security and to help them anticipate what’s likely to happen next. Establishing calm routines in the early days, and helping babies to settle themselves to sleep so that they can enjoy their cots or sleeping places, can prevent difficulties later.

Physical development

Babies gradually learn to have better control over their bodies. One of the first things they can control is their neck muscles, so they begin to hold their head steady and turn it to follow sights and sounds. They can also use their hands and arms more purposefully and will start to reach for objects and grasp them. You can help and encourage development by playing with them using toys, like rattles, that fit their grasp and make interesting sounds when shaken.

Creative development

Toys that light up, move or vibrate are likely to be favourites at this stage and they can help babies begin to learn about cause and effect (“When I touch this, it makes a noise”). Remember that when playing with your baby it’s important to match your pace to theirs – leave them plenty of time to take their turn. You can help babies strengthen their muscles by holding them while they exercise their arms and legs, or by playing with them on a play-mat so that they can begin to learn how to roll and turn their body.

Moving on

Babies don’t necessarily master all the things in Step 2 before they start doing things in Step 3. The Journal simply describes typical patterns of development as new behaviours and skills are learnt.

Remember that all children are individuals and follow their own patterns.

One way to make the material more personal is to add photos and to write down things that have happened or that your child has done that that are not covered in the tables. There is space to do this at the end of each Step, on the page called Special events and achievements.

Developmental journal
Developmental Journal
A summary of development during Step 3

Personal, social and emotional development
Children begin to show more signs of picking up on other people’s behaviour. They respond more clearly to facial expressions and how you talk, and respond more to other people’s emotions. Your child may begin to indicate they recognise you by ‘greeting’ you and by behaving differently when they’re with strangers. Children become more active about trying to get your attention and in general they explore the world more.

Children also begin to show more signs of wanting things and express their needs more purposefully. Responding to this and rewarding them is important – it encourages your child to communicate with you and with other people. Often, children in this Step begin to use sounds or gestures more consistently to tell you what they want. Responding encourages them to do this more.

Communication, language and literacy
Children in Step 3 become more active and begin to explore their world. They’re more confident about reaching out and grasping things and take more interest in their surroundings. They also begin to recognise objects and people, and to understand how things go together. For example, they may begin to associate a spoon with feeding. Talking with your child about the things they’re showing an interest in helps them to learn that things have names. This builds the foundations for language. Even though they’re not yet speaking, children are learning a lot about language and communication. It’s important to help them by repeating things, talking in simple, clear ways and talking expressively.

Children have already learnt a lot about the sounds of language by listening to people talking. As they move through Step 3, they begin to use more speech-like sounds themselves. Some children find it hard to remember things from sound alone, so you could start using simple picture books and name the objects, people or animals in the pictures.

Problem solving, reasoning and numeracy
It’s easy for children to get frustrated when their wish to do things is out of step with what they are able to do. You can help by matching the things around them to their ability level, and reassuring them and giving them something easier to do if they get frustrated. Children in this Step learn a lot when you help them to do things they can’t easily do by themselves, but can manage with a little support from you. As well as giving them experience of success, this helps them to prepare for new and different challenges in the future. You may also need to give your child physical support – if they’re struggling to stay sitting upright, they won’t be able to concentrate on anything else.
Knowledge and understanding of the world

One of the important things you can do now is to share experiences with your child. Point to things, talk about what they’re doing and talk while you play with a toy together – this all helps the two of you focus attention on the same things. Once your child can follow your pointing or look where you’re looking, encourage this. Some parents find that using gestures and signs is a good way of communicating. Use whatever works well to build two-way conversation with your child – for example, if they like to imitate you, encourage this.

Physical development

Children at this point in development are gaining more control over their hands, arms, legs and feet. They’re able to hold objects and turn them round while they look at them. They’re more precise when they reach for things and grasp them and may be able to start putting pieces of food in their mouth.

Creative development

Although children are making sense of the world about them right from the moment they are born, it’s more obvious now that they’re noticing things and thinking about them. You may see your baby staring intently at something interesting, like a television programme or an unfamiliar person. You can help by talking about what they’re looking at.

It’s exciting when children start to babble, linking speech sounds together and saying things like ‘ba-ba’. Encourage your child by copying their babble sounds back and then introducing new ones for them to try – for example, copy your baby’s ‘ba-ba’ and then try ‘da-da’.

Moving on

You may like to add some notes about how your child is developing as a person, about their emerging personality, to the material recorded in tables. It can be interesting later on to look back at how you saw your child when they were younger.

And don’t forget you can make the whole Journal more personal by recording anything special that has been happening in your child’s life in the Special events and achievements section.

**Developmental Journal**

A summary of development during Step 4

**Personal, social and emotional development**

Children start joining in more with games that you play together – for example, bouncing on your knees to favourite songs or rhymes. Games like these are good, because they help children learn about routines and to anticipate what might happen next. A key part of building a secure relationship is good emotional communication. Your child needs to learn that you can be relied on for comfort, for sympathy and general understanding of their ups and downs. Being sensitive and responsive to your child’s needs and how they express them is important.

**Communication, language, and literacy**

Children are keener to communicate and they’re on the way to learning to talk. As well as using more recognisable speech sounds, they point, nod and shake their heads. They make more effort to communicate and if they’re not understood straight away, they repeat what they ‘say’ to get their message across. For some children, this is a frustrating time. You can help by saying what you think your child is trying to say. Using short, simple sentences shows children how thoughts can be put into words.

Children begin to combine sounds, too – they string sounds together and make short ‘sentences’ of sounds or longer strings of babble that begin to sound more like speech. Your child may start to use particular sounds to mean particular things – for example, when they want a drink. These ‘sounds for things’ are the first steps towards words and are a great achievement.

Your child is also likely to start copying sounds and movements that you make and this can be the basis of fun games together. You’ll find they enjoy watching your face and can copy lip movements. Remember that any games using speech sounds help children to hear all the sounds in words and this in turn helps them to learn to talk, and lays foundations for reading and writing.

**Problem solving, reasoning and numeracy**

One of the reasons why children want to communicate more is that their thinking and understanding have developed. You can help by introducing toys and activities that bring more variety and new challenges, remembering that young children need things that stretch them a bit, but not too much. Giving plenty of success and praise encourages children to develop their abilities and to be adventurous in tackling new things. In Step 4, children often benefit from lots of repetition – what seems boring to us is new learning for them, and repetition helps to consolidate learning. Children learn a surprising amount through observation as well, so give your child plenty of opportunity to watch you and other people going about your everyday lives. You may also notice that your child’s memory is improving and that they’re recognising people and things for the first time.
Knowledge and understanding of the world
As well as staying awake for longer periods, children become able to sustain attention on activities for longer. They’re able to concentrate on things and are more observant of the people and events around them. Your child will probably start to look at you to see how you react to things like sudden noises, or the things that they do, like banging a toy on a table. As well as responding clearly, it’s good to talk about the things that you’re both attending to. This helps your child develop an awareness of other people’s thoughts and feelings, as well as making connections between events, words and consequences.

Because of their new interest in you and what you think, this is an important time to show your child how pleased you are whenever they learn something new.

Physical development
Around about this time, children can get around more efficiently on the floor by crawling and they start to pull themselves up to stand. As your child becomes more mobile, making your home safe and ‘child-friendly’ is a priority. You can help them develop by holding them up and supporting them, while they practise moving. Children also become more able to pick up objects and do new things with them. It’s a good time to introduce toys with new features that offer new possibilities and challenges.

Creative development
Children are learning a lot about the wider world and about the things in it. They’re beginning to understand that objects exist even when they can’t be seen. Before, it was as if ‘out of sight’ was ‘out of mind’, but now children start to find objects that are hidden, so you can play peek-a-boo and hiding games, which are especially interesting to children at this stage of development.

This is a good time to introduce pretend games, like ‘feeding teddy’ – even if to begin with, children can’t do the actions for themselves. As they get better at doing things, children get especially interested in the results of their own actions – for example, they may have fun putting one thing on another and then pushing it over. Choosing appropriate toys, and joining in yourself, helps children get the most out of this sort of creative game.

Moving on
Children often make progress in one area faster than they do in others, so keep looking back at earlier Steps and forward to some of the things described in Step 5, to see how your child is progressing.

Step 5

Developmental journal
Developmental Journal
A summary of development during Step 5

Personal, social and emotional development
Your child’s attachment to you is likely to move forward. You’ll begin to notice that they behave differently towards strangers and may even show anxiety when strangers appear or when you have to leave them for a while. Giving your child comfort and support helps them to cope with these new feelings. It also helps them to learn that you can be relied on to return, even if you’re out of sight for a while. Don’t let them get too distressed if you have to leave them; this can make it more difficult for them to become more independent later on.

Communication, language and literacy
Children in Step 5 start to use language for all sorts of purposes. They begin to use their own ‘sounds/words’ for things and clearly understand simple things that you say to them. They can point to pictures of objects when you say their names, so this is a good time to introduce simple picture books, if you haven’t already done so. Your child will continue to learn a lot from hearing you and other people talking about what they’re experiencing – about what they’re seeing, hearing, feeling and doing.

As well as starting to use a few recognisable words, children use gestures and particular sounds to communicate. Although helping and encouraging them to learn to talk is important, it’s communication – getting the message across – that’s the key thing. Use whatever works best for you and your child – words, signs or gestures – and continue to praise their efforts and successes. Continue using listening and speech sound games for words and sounds – they really help.

Problem solving, reasoning and numeracy
Your child will probably also start to be more expressive, using different tones of voice to call you and to ask, tell or refuse. When your child starts to say ‘no’, daily life gets more difficult, but it’s also a positive sign that they’re ready to take some control over their life. Children in this Step can sometimes be ‘difficult’, and get frustrated by things that they want to do but can’t or shouldn’t do. Having interesting toys and activities available to use as distractions can help to overcome some of these difficulties.
Developmental Journal
A summary of development during Step 5 continued

Knowledge and understanding of the world
Children in this Step think about more than what’s in front of them. They’re aware when something is missing or when they want something that’s not in sight. Again, this is where communication comes in. Responding to what your child is trying to express – for example, when they want something – shows them how useful it is to communicate.

Physical development
Children become much more mobile. You can help your child strengthen their muscles and develop their physical skills by playing active games with them. It’s important to make their play spaces safe and to provide a stimulating environment that encourages them to explore.

Creative development
Picture books are enjoyed by most children in Step 5, especially when you look at them together. Books can help your child learn the names for categories of things as well as objects and people, because they can now recognise different groups of things like cars, cats and cushions. Looking at books with children is a great way for them to learn, as they remember things that they see and hear more easily than things that they just hear.

Moving on
Children don’t always make progress at the same speed. Sometimes they need to ‘consolidate’ their learning and it may seem as if they’re not moving forward at all. This is only a worry if it goes on for a long time, and it doesn’t seem as if they are improving the skills that they already have. Don’t forget that illness, or big changes in family life can also lead to ‘plateaus’ (flat spots) in development.

Step 6

Developmental journal

Early Support
Helping every child succeed
Developmental Journal
A summary of development during Step 6

Personal, social and emotional development
Children become more sociable towards other children, begin to show interest in what they’re doing and try to join in. There’s a lot of new learning involved here – how to be gentle with other people, how to take turns and so on. You’ll probably need to keep a close eye on your child during first encounters, to help them learn the rules of playing together. You may also need to help them learn to communicate with their playmates – for example, by showing them how to ask for things, rather than grabbing them.

Many children develop a strong attachment to a particular soft toy or blanket and cuddle it when then they feel tired or unhappy. This is their way of learning to comfort themselves, without relying on you to do it. Don’t take such signs as rejection – your child will still need you to be there for them when they get really upset!

Your child’s growing independence may also mean they become more wilful. They may ‘play up’ at mealtimes and sleeping difficulties can become a real issue. Regular routines can help your child continue to learn that life is predictable and that there are particular times when particular things happen. It’s important to set clear boundaries and stick to them to help children learn to behave in ways that are socially acceptable.

Children begin to feed themselves with a spoon (a messy business, but very important for their self-confidence). It’s time to introduce your child to other practical skills like brushing teeth, washing and dressing, as well.

Communication, language and literacy
Plenty of talk about things that a child is interested in helps to build up their store of words. They’re likely to be interested in copying your words, sometimes just to try out new sounds and are beginning to learn how words can be put together. Soon children begin to use these new skills to express more complicated ideas and wishes. Generally, children are better at understanding language than speaking it, so it will help if you try to match what you say to what your child can understand. In this Step, children still understand simple, short sentences best.
Developmental Journal
A summary of development during Step 6 continued

Problem solving, reasoning and numeracy
Lots of new skills emerge as children make progress through Step 6. ‘Reading’ a book by turning the pages, building with blocks, putting things together and taking them apart all show your child’s growing curiosity and expanding interests. You can help by providing new sets of toys from the kitchen cupboard and elsewhere – pots, pans, empty plastic tubs, wooden spoons. Children develop longer attention spans, but there are also likely to be times when they find it hard to maintain their interest. It’s important not to push them when they’re finding it hard to stay interested in something. Equally, it’s important to encourage and praise them when they’re doing well. Self-motivation is growing fast and you can help by making sure your child has plenty of experience of success.

Knowledge and understanding of the world
Learning by watching other people is becoming more important and children begin to learn about language by listening to you talking with other people. Playing with another child who is at a similar level of development and ability can also be very helpful – as can television. Many children’s TV programmes have good picture content to help children understand the language being used – they’re good ways of hearing a lot of language being used. Reading picture books together, encouraging your child to point to pictures and playing picture-matching games also continue to be good ways to help children learn words.

Physical development
During this Step, many children begin to walk and talk. Being able to walk gives children many more opportunities to explore. Being able to talk gives them many more ways to say what they think and feel, and for you to help them use language to learn. It’s important to arrange your house so that your child has plenty of opportunities to walk about and explore safely, so they can make the most of their new skills. Time outside to exercise is good, too, and helps children learn more about the world.

Creative development
Children are beginning to understand what it means to pretend. Children enjoy ‘feeding dolly/teddy’ together, and these sorts of games help them to learn more about caring for themselves and other people. Other sorts of imaginative play, like playing with toy farm animals or toy cars, are good ways of developing creativity.

Moving on
This is a time when children are especially eager for new experiences, and it’s a good time to give them plenty of experience of the world outside as well as giving them plenty of things to do at home.

Developmental Journal
A summary of development during Step 7

**Personal, social and emotional development**
Children at this stage of development express their emotions and needs more clearly in words. It’s important to respond, showing that you understand what they’re thinking and feeling, as this helps children manage what are sometimes strong new feelings. You may find your child now understands if you ask when you’re not sure what they’re trying to say to you. Gestures and signs help.

Children are learning to play games with other people, so this is an important time for them to learn about consideration for other people. You can help by encouraging simple co-operative games that involve taking turns. Picture card games can be fun and help with learning the names for things as well. You can also encourage co-operation with other children by providing plenty of toys and other things to play with. Sharing is a difficult idea for children to learn and having two of a favourite toy helps to avoid squabbles! You can help by showing how to give and take. Relationships with brothers and sisters become more important now, because children learn from and with other children a lot more from this point forward.

**Communication, language and literacy**
Children have now got the idea that things have names and so this is the time you may see a ‘vocabulary spurt’ when children want to know the names for everything. Not all children show this sudden interest and for some, it happens a bit later, in Step 8 or 9. As well as learning lots of new names for things, children often also learn a few action words that they combine with names to make simple sentences like ‘milk all gone’ or ‘dolly sleepy’. You can help them develop this ability by expanding what they say and repeating it back to them as part of the conversation. For example, you might say “Yes, the milk has all gone” or “That’s right, dolly’s sleepy and wants to go to bed”.

Once your child has learnt a name like ‘dog’, you may find they start to call all furry, four-legged animals ‘dog’. This is a good sign – they’re thinking about things that go together, and if you help them, they’ll soon sort out which animals are dogs and which are cats! Children sometimes find it hard to learn to say some words clearly, so any games that help them to practise talking are good.
Developmental Journal
A summary of development during Step 7 continued

Problem solving, reasoning and numeracy
As well as starting to put words together, children get better at putting actions together. For example, they start to learn the order in which to get dressed, or how to put different parts of a toy together. Your child may be able to copy you when you build a tower of two or three blocks. As they get more able to use their hands and fingers, children enjoy playing with toys that have smaller parts, and pieces that fit together. They still use their mouths sometimes to explore things, so you still need to watch what they’re doing carefully. You may notice that your child is beginning to show a preference for one of their hands when doing some things – for example, using a spoon.

Knowledge and understanding of the world
In this Step, children are interested in objects that make sounds or react in different ways. Books with flaps to lift up and textures to feel as you read them together become particularly interesting. Attention spans are improving, giving more scope for activities that last a bit longer. You may also notice that your child’s memory is developing – they begin to recognise things and remember what to do with them.

Creative development
Because of all the new things they can do, children’s play becomes more complicated and you can introduce new ideas for them to build in. Feeding dolly turns into getting dolly out of bed, getting her washed and dressed, and then giving her breakfast. This is an important way for children to learn more about taking care of themselves. You can begin to use simple instructions to help your child learn. At first, link telling with showing them how to do things – this makes it easier for them to understand.

Physical development
When your child has learnt to walk, they can learn new things like climbing stairs, running and kicking a ball. It’s worth fitting some ‘letting off steam’ activities into your child’s day. Follow these with ‘quietening down’ times, like reading a picture book together, because some children need help to calm down after being very active. There are likely to be times when your child is not very co-operative because of their growing independence, or sometimes because they are frustrated. Offering a favourite, familiar activity can be a good way of heading off these difficulties before they become issues.

Moving on
Helping your child to get on with other people, both children and adults, is an important feature of this Step, and this can help them later on to make the most of learning from being with other people.

Developmental journal
Developmental Journal
A summary of development during Step 8

Personal, social and emotional development
Children now have much more of a sense of their separate identity as people and they clearly recognise the different people in their life – they may recognise familiar faces in photographs and know their own name.

They often show a lot more positive affection towards the people they love. However, this goes along with growing independence and so it can be a difficult time. Children sometimes find it very hard to deal with life when they can’t do things for themselves, or can’t have what they want, and these sorts of frustrations bring strong emotion. Sometimes this may be expressed as hostility towards other people. It’s important that you help your child to learn how to handle these powerful feelings in an acceptable way. You’ll need to give comfort and emotional support at such times, as well as clear messages about what is and what is not acceptable.

Self-help in daily life (feeding, washing and dressing) is something that can be encouraged and rewarded, one step at a time. For this sort of learning, and for many other areas too, you can help by offering just enough support for your child to experience success. Success builds self-confidence and a wish to achieve more and helps children feel good about doing things for themselves. During this Step, children can feed themselves, some of the time. You can help motivate them by giving them a lot of variety in their food, while making sure that they can handle it, either with fingers or a spoon.

Communication, language and literacy
Children begin to put words together into short ‘sentences’, often using signs or gestures as well. Sometimes it can be hard to understand what they mean, because they’re just starting to learn how sentences are built. You can help them learn the rules by repeating back to them what they say in a more ‘correct’ or complete way. For example, if your child says “Put dere”, you could say “Yes, put it in there”, stressing the different words. Use a positive tone – confirming that you agree with what they’ve said and you’re giving them an opportunity to learn from hearing you say it. It helps if you continue to match the level of what you say to what your child can understand and use plenty of rhythm and intonation.

Children learn a lot by listening to and watching other people, so it’s important to give them plenty of experiences that encourage them to do this.

This Step links with Early Years Foundation Stage (EYFS) Phase 3
Developmental Journal
A summary of development during Step 8 continued

**Problem-solving and reasoning**
Children’s growing understanding and thinking means that play can get more varied and complicated. Your child’s attention span is increasing and so they’re able to tackle more challenging activities. Simple shape-fitting puzzles with a few large pieces help children to use fingers and hands. Playing with toy plates, cups and pretend food is fun during this Step and your child can learn a lot from games like this, where daily activities are acted out. These sorts of games also help children to learn by playing with brothers, sisters and friends.

**Knowledge and understanding of the world**
Your child’s thinking about the world is progressing all the time. One way this shows itself is in putting things into categories and learning the names for groups of things. Sorting games, like putting things into boxes (all the blue ones go here and all the red ones go over here), can be an enjoyable way of encouraging this and talking about how things are the ‘same’ and ‘different’ also helps. Going to your local library to get new picture books can help you give your child more opportunities to learn.

**Physical development**
Most children are now more mobile around the house and outdoors, but if your child is still learning, make sure that they can see and get to plenty of interesting toys and activities – this will encourage them to move.

**Creative development**
‘Home-made’, personal books, using family photographs with 2 and 3 word ‘sentences’ are fun to make together and can be very helpful. Reading books about your family, together, can help your child with joining words together – many children learn to read the words quickly.

**Moving on**
Your child may now be ready to play with other children in a toddler group or some other kind of pre-school group. This will help them learn social skills and give them more chances to learn by watching other children play. Your child may be clingy for the first few times in a new setting, but this is part of learning that you can be trusted to go away and return for them later. If you’re considering leaving your child in the care of someone else for the first time, don’t rush into leaving them until they’re ready. Children need you there at first, for reassurance. Then try leaving for a short time, to get your child used to the idea and to learn that you will come back.

Step 9
Developmental Journal
A summary of development during Step 9

**Personal, social and emotional development**

Your child will now be experiencing a wide range of emotions and will try to express them. Sometimes it’s hard to work out what they’re feeling from what they say and do, so it’s important to show warmth and affection as you encourage them to put their feelings into words. Children typically find out around this time that they can ‘pretend’ about things that they’ve done or have not done, just as they can pretend in play. This is another sign of their growing independence, so in some ways it’s a positive thing, but you need to help them learn what’s right and wrong in this area!

Self-help skills are an important focus as well. Children begin to take part in dressing themselves, washing, drinking and eating. They also begin to join in with simple domestic jobs like tidying toys, setting the table etc.

**Communication, language and literacy**

In this Step, children learn new words every day and talk much more. They’re getting better at putting short sentences together and at putting ideas into words. Your child will pick up new words from what you say, so lots of talk about what you’re doing together continues to be important. Reading to your child from picture storybooks helps them to understand about words because the pictures provide visual support. By now, your child may be able to point at a picture of a horse when you ask “Where’s the horse?”

Children’s early speech is often quite unclear – they find it hard to say some sounds and they get other sounds wrong. You can help your child speak more clearly by getting them to copy how you say words. Try to make sure there’s not too much background noise, so that they can hear what you say easily, without getting distracted. Games that involve picking up differences in speech sounds, like “Where’s the cat?”, and “Where’s the hat?” encourage listening and speaking. Children can usually make sense of a lot more than they can express, so it’s important to step up the level of what you say, to match their growing understanding.

You can now have real conversations with your child. They find out that ‘why’ and ‘how’ are useful words, and if you give them answers at a level they can understand, their curiosity grows. Their memory is improving as well, and this lets them talk about what happened yesterday, or about things that are not in front of them or people in the family that are not at home. It’s worth deliberately bringing these sorts of topics into your conversation, so that your child can practise this important aspect of thinking and talking.

Learning some reading skills can begin now, too. Cards with words on can be used to show the link to words in the picture books that you’re using. Reading, and building skills that lead to reading, can give a real boost to your child’s language abilities. It can also help them to improve the clarity of their speech.

This Step links with Early Years Foundation Stage (EYFS) Phases 3 and 4
Problem solving, reasoning and numeracy
Children at this stage of development are better at remembering how to do things in daily life – so when you say “Brush dolly’s hair”, they’re more likely to know what to do. You can encourage this by commenting on things that happen regularly in their life – for example, “It’ll be time for a bath soon.” Children are also more aware of changes to routine. You can build on these developing abilities by playing hiding games or by putting familiar things in unexpected places in a jokey way – for example, you could put a sock on their hand. Children very much enjoy little homemade books like ‘My favourite toys’ or ‘I went to the zoo’. These don’t need to be smart – cutting out pictures from magazines or making drawings, and sticking them into a book that you make by stapling together some sheets of paper works well.

Knowledge and understanding of the world
Children become more curious about other people and more sensitive to their feelings. Watching and copying what other people do is an important way for them to learn. You can encourage this by making opportunities for your child to play with other children. Playing with water and sand are good activities for children playing together and they help young children learn about how to co-operate. Of course, you’ll need to keep an eye on this sort of play, so that you can intervene to help sort out any difficulties! Try to do this in a way that helps your child build their social skills. It’s also valuable for children to watch you doing things with other adults and, where appropriate, to be included – for example, watching television together. Programmes that engage your child’s interest and introduce a range of topics can be an important stimulus for learning.

Physical development
Your child will be becoming more aware of the signals their body gives them about the need to have a drink, to eat and to go to the toilet, so this is a good time to start toilet training. Around this time, children also start to be more adventurous in their play. They start to push and pull things, and generally to be much more physically active.

Creative development
Children become more interested in drawing and enjoy expressing themselves in this way. You can join in by doing simple drawings with them, while talking about what you’re doing. You could start introducing some letters as well – for example, by printing their name and spelling it out. It’s a long time before your child will be writing, but like most other things, you can help to build a foundation, by introducing the idea early on.

Moving on
Going to playgroup or play school with other children of the same general level of development can benefit your child enormously. Children can experience a wider range of play activities in a playgroup than it is easy to provide at home and they learn a great deal from each other. They also learn a lot about play, about the behaviour that’s expected and about self-help skills.

Special events and achievements
These are the questions we want to ask
Developmental Journal
A summary of development during Step 10

Personal, social and emotional development
The boundaries of the world are expanding, although your child will still appreciate you being there as a source of security – particularly in new situations. Children are brave explorers and they’re often unaware of the dangers around them, so they need to be watched carefully, as they can now open doors and wander off. They’re curious about people and will often ‘people watch’ and imitate other people’s behaviour. By the time they reach this Step, children are growing more and more independent, particularly with feeding, dressing and toileting, and will defend their own space and toys, and their right to do things in their own way. This means they may need help and encouragement to adjust their behaviour to fit in with other people – for example, when playing with friends. You may now be able to start to involve your child in everyday routines out in the wider world like putting shopping in the supermarket trolley, or paying at the till. It’s helpful to match such tasks to your child’s ability, so that they get plenty of positive rewards when they join in.

Children sometimes get angry and frustrated when they can’t communicate what they want to say. They may also be jealous for your attention when it’s not on them. At the same time, they’re likely to show more affection and concern for other people – for example, going to get an adult if another child is upset, or offering a cuddle or pat on the back if someone else is crying.

Communication, language and literacy
Children begin to use longer sentences and experiment with putting words together in different ways. Sometimes they say things that don’t obey the rules, like “Daddy goed to work” or “There are lots of sheeps”. This is a good sign, because it shows they’re trying to work out what the ‘rules’ are. So it’s not very encouraging to say they’re ‘wrong’ – it’s better to repeat back to them what they’ve just said, but in the ‘correct’ form – for example “That’s right, Daddy’s gone to work” or “Yes, there are lots of sheep in that field”.

Reading books together helps your child to understand and use words in sentences correctly, over time. Homemade books with short sentences that use words and sentences, at the right level for your child’s understanding, and which match their own use of language help to ‘personalise’ reading activities at this level of development.
Developmental Journal
A summary of development during Step 10 continued

Problem solving, reasoning and numeracy
If they are encouraged in a positive way, children love to join in simple activities like washing up, making sandwiches, helping to mend things and so on. These all provide opportunities for them to listen to other people and learn about how these things are done. You might like to introduce them to visual ways of presenting routines, like charts and timetables. It may also be the time to begin to help them understand ideas about time – for example, by starting to use time words by saying “Your egg will be done in a minute” or “It’ll be time for bed in half an hour” and showing how clocks are used.

Knowledge and understanding of the world
Children's ability to focus their attention on things for longer periods is increasing. You can help by finding activities that take more time. However, your child may find it hard to shift attention when you want them to, so you may need to be patient when you want them to finish something. Some children also want everything always to be done in the same order – this expresses a wish to control things around them. Sometimes the world can seem very complicated to a young child and order and predictability help them feel more secure, as well as providing good opportunities to learn. If your child is going to a pre-school group, you may find they want things to be done in the same way there and at home.

Physical development
Mobile children need plenty of exercise and lots of opportunity to develop their bodies and movement skills. Many young children are very energetic and they run around, kick balls and go climbing. This brings new risks, so you will need to help them to stay within their ‘safety zone’. Family outings are a good way to provide lots of different learning opportunities.

Creative development
Children use daily routines as part of their own play, even when there’s no adult around to imitate – for example, they may set up a tea party for their toy animals and dolls. Your child’s imagination and creativity is growing and you can help them to explore ‘pretend play’ with toys and with props, like dressing-up clothes. When your child tries to walk like an elephant, join in by becoming an elephant, too. Imagination games and telling stories help, while paints, dough, stickers, drawing and cutting all encourage creative work. Messy play with water and sand is a good outlet for children’s energy and gives them other ways of learning, using different senses. Most pre-school settings provide a wide range of opportunities to explore pretend play, with many other children around to copy and learn from.

Moving on
Your child may be confrontational when what they want isn’t the same as what you want. How you handle these small conflicts can stop them turning into big issues. Achieving a balance between your wishes and those of your child is important. Children need to learn self-control and not just to be controlled by you. Learning to wait is often an important issue for young children, and you need to be sensitive to how long your child can realistically be expected to wait. Lots of praise for self-discipline is very effective.

Developmental journal

Step 11
Developmental Journal
A summary of development during Step 11

Personal, social and emotional development
In this Step, children become better able to accept being apart from you for longer periods of time. This is affected by how much experience they have had of other people looking after them, but it’s going to be a big part of their life soon. You can help by continuing to build a secure relationship with them. This means expressing your positive feelings for them, praising them for things they do that you value, being consistent in doing what you say you will do, and generally letting them trust you as a reliable and loving person. It also means taking their thoughts and feelings seriously. Children at this stage of development often have fears and worries that seem silly to adults, but are very real for them. If they feel that they can trust you to listen, it helps to give them confidence in you as an ally through all the challenges that lie ahead.

Communication, language and literacy
Although your child may also still be using signs and gestures, in general, in this Step, children are expanding their use of language and talking in longer sentences. They may be using words like ‘and’ to join ideas together, and words like ‘the’ and ‘he’ to mark what they’re talking about more clearly. You can continue to foster this with plenty of talk, ‘personalised’ reading books and games, new storybooks and nursery rhymes. You may still need to help children out sometimes, by repeating what they say in the correct form. But in general, they understand much more of what you and other people say, and you can have longer and more complicated conversations. Your child is probably also finding out that language can be used to assert independence. ‘No’ is a useful word when you’re a child! Finding ways of talking through differences of opinion is important, because it can help your child to think things through for themselves later on.

Reading is a valuable way for children to improve their language, because it makes use of their visual skills. It’s also a way for children to broaden their understanding of how things go together in sequence. Learning to do things in the right order is important in many areas of life. Stories are one way that children learn this. You can help by playing games, putting things in the wrong order so that they spot it, or asking them what comes next. Children like to play with toy figures and ‘acting-out’ everyday sequences of events, such as going out shopping.
Developmental Journal
A summary of development during Step 11 continued

Problem-solving, reasoning and numeracy
Although school is still some way off, you can help to prepare your child for the sorts of things that they will be doing by introducing simple number games and drawing and painting, as well as continuing with activities that involve recognising sounds, letters and words. Being able to follow instructions is another important skill that they’ll need. Children learn about classroom routines at pre-school or nursery – this is very important preparation for going to school.

Knowledge and understanding of the world
Your child’s confidence and ability to play with other children and relate to other adults and strangers is growing. It’s an important step forward when they begin to work out what other people are thinking and feeling. Talking about your own thoughts and feelings can help with this, and talking about what they may be thinking or feeling is good, too. Your child is likely to develop some close friendships now and this is another valuable way for them to learn social skills. Building good relationships with brothers and sisters continues to be important – creative activities like cutting and sticking, or using clay, allow children of different ages and abilities to have fun together.

Physical development
Outdoor activities that develop physical skills in a safe environment are important at this stage of development. Your child will probably be happy for quite long periods using playground equipment, especially if there are other children or adults around who join in. Learning to take some risks, but doing so safely, is something that you can help with.

Creative development
Children in Step 11 play with things like bricks and other construction toys in more elaborate ways. You can help by joining in and suggesting ways in which the constructions can be extended and played with. Your child will begin to be able to play pretend games now – hide-and-seek is fun.

Moving on
Putting on and taking off shoes and coats, toileting, hand washing and eating are all likely to still need plenty of practice. As with many other things, rewarding small steps in the right direction is the key to helping children make progress.

Developmental Journal
A summary of development during Step 12

Personal, social and emotional development
This Step can often be a challenging time for both parents and children. It’s because children are getting a stronger sense of their own abilities and, understandably, want to use them as much as possible. This can lead to conflicts between growing independence and the need to understand risks, limits and boundaries. This may come out as stubbornness, negativity or anger when frustrated, but these are also positive signs of a child’s motivation. So, it is important to keep showing your child that you care about them and that you can help them to deal with these new challenges.

Communication, language and literacy
Language flowers in children during Step 12. They not only learn many new words, but they’re also talking about the past and the future, whereas before, much of their talk was about the here and now. As well as speaking in longer and more complex sentences, they may also talk to themselves while they’re doing things. There’s nothing wrong with this, in fact it’s a good sign that they’re using language more now to make sense of their experience.

Your child is likely to be taking more interest in stories, ones that you tell, as well as ones that you read to them from books, and they’ll be getting used to the idea that books have stories in them and the concept of reading.

Problem solving, reasoning and numeracy
With your child’s developing mental capacities comes an increasing ability to think about how to approach more complicated situations where solutions aren’t immediately obvious, like fitting shapes into simple jigsaw puzzles, putting together plastic bricks and threading beads. Although they have been building the foundations for understanding number concepts since they were born, it’s at this stage of development that children start to really think about ideas like counting and adding up. Giving them appropriate materials to support this is important – for example, a pot of buttons, or small coloured blocks.
Developmental Journal
A summary of development during Step 12 continued

Knowledge and understanding of the world
This is also a time when children’s fears can increase as they begin to appreciate more about the wider world. ‘Why?’ is likely to be a common question, and giving explanations at a level that your child can understand helps to reinforce your role as someone who can help them to learn. Your child is likely to become more curious about how things work, so it’s helpful to give them toys and other objects that have parts that can be taken apart and put back together again. It’s also a time when children can practise operating some household equipment, with your support to ensure safety – for example, the hoover.

Physical development
Children are becoming more independent and more confident about tackling physical challenges and learning new motor skills. Playground equipment, bikes and trikes and ball games are all active pursuits that help this learning, as well as contributing to general health and fitness. But children still tire easily and need help with pacing themselves and with ‘wind-down’ or quiet times. They also need your help with assessing risks so that they are aware of the limits to their abilities and don’t over-reach themselves. For many children, swimming and water games are particularly enjoyable and, of course, they’re good for general fitness.

Creative development
At this point in their development, children make much more use of materials like paints, play dough, cutting and sticking, and crayons, and become a lot more ambitious about what they attempt. They are also developing their imagination, and this shows in their fantasy play. It’s good to introduce new toys and materials that encourage children to use these new abilities, and also to join in yourself, so that you can share new experiences and sometimes, show your child what’s possible.

Fantasy play with other children, like dressing-up games and ‘home corner’ play, is an excellent way for children to explore different roles and practices. It’s good to make sure that there are enough ‘props’ available to support this kind of play.

Moving on
One of the key things that are learned during this stage is to understand that other people’s feelings need to be taken into account. This forms the basis for sharing and cooperating, which become increasingly important from now on.

Talking with your child about thoughts and feelings helps them to gain this sort of understanding, and sorting out conflicts with friends and siblings helps too. You may need to offer guidance in these situations so that your child can develop their own ways of dealing with the challenges that come with learning to get on well with other people.

A summary of development during Step 13

Personal, social and emotional development
Relationships with other people, especially ‘significant others’ like parents, carers, and brothers and sisters, become more important for children in this Step. They seem to care more about the people that matter to them, and more prepared to fit in with what other people want to do and how they want to do it. It’s around this time that children start to model their behaviour on what other people do – usually people to whom they feel close. You can encourage your child to join in with family jobs around the house, like tidying up, and to take pride in self-care routines by offering your support and praise when they get things right.

If your child is spending time in an early years setting, fitting in with the routines of the setting gives another opportunity for this sort of learning, but it’s not always easy for a young child to adapt to a different set of expectations. It’s very common for children to be tired and irritable after spending time in an early years setting, especially during the first few months. This is partly a reflection of the challenge of being with a lot of relatively unfamiliar people, without the support of their main attachment figure(s). Settling into a new environment like this is a real achievement for a child.

Communication, language and literacy
Talking, reading and writing all begin to join up with one other at this stage of development. Children begin to recognise their name when written, and to ‘crack the code’ that links letters and words with meanings that up to now have come mainly through speech. You can help this transition into reading and then writing by making sure that when you share picture books with your child and make marks on paper with them, you have fun together.

Problem solving, reasoning and numeracy
Learning about numbers and counting is also an enjoyable part of learning. At this point in their development, children often get particularly interested in the similarities and differences between things, and playing grouping and counting games together is a fun way to encourage important new learning.

This Step links with Early Years Foundation Stage (EYFS) Phases 5 and 6
Knowledge and understanding of the world
Children become much better able to talk about their growing knowledge, and more interested in hearing explanations for things they don’t yet understand. They’re taking in more ‘facts’ about the world through books, magazines and television. They are also keen to learn about more complicated and interesting objects through ‘hands-on experience’ – not just toys. So it’s good to provide a range of materials and objects to play with that work in different ways for different purposes – for example, an egg whisk, a torch, an old alarm clock or tape recorder and other household objects.

This is also a time when children can begin to learn from computers, using age-appropriate games and learning resources.

Physical development
By the time they get to this Step, children are quite skilled, and need plenty of opportunity to exercise and keep fit. This means making time for activities outside as well as inside, and giving children a chance to use a range of different equipment. Some children enjoy organised sessions at leisure centres or other places where children of similar levels of development can benefit from being with trained people and using more specialised equipment. But this is also just about letting off steam and having fun.

Creative development
Children begin take a greater interest in other people’s creative products – for example, stories, pictures, films, music and photographs. Encouraging your child to express their own creativity is important, if they seem to become over-critical of their own work and to lose motivation as a result. Making little books of short pieces of writing that you help with, illustrated with photos and drawings made by your child, can be a very good way for your child to explore their thoughts and feelings. Providing plenty of materials of different types, like paint, clay and paper shapes, will help your child find out which things they prefer to work with.

Moving on
The time has come when you can have real conversations, not just about the here and now, but also about past events and future plans, hopes and fears. Simply finding time to talk is one of the best ways to continue to build a good relationship with your child and to help them to meet the challenges that they will face as they grow older.

Developmental Journal

A summary of development during Step 14

**Personal, social and emotional development**

By the time children reach Step 14, they have become aware of themselves as a unique individual, with their own thoughts, feelings and preferences. They’re aware that other people have their own personalities, wishes and needs, and that there are many different ways in which people live their lives.

The next step is to learn to respect these differences and appreciate the value of other people’s ways of doing things, at the same time as feeling part of one’s own family and community. It’s also about learning the social skills to join in with others in play and constructive activities – skills that are best learned in small groups of children at similar levels of ability, with adult support.

Children’s growing emotional maturity also means that they are better able to put their feelings into words. Talking with other people about the good and bad things that they experience continues to help children feel secure in their special relationships.

**Communication, language and literacy**

Children at Step 14 are fluent communicators and usually fluent speakers, although some may use sign language or technology to help them get what they want to say across. They use reasonably well-formed sentences and can put together quite long narratives about the things they’ve done. They’re also asking a lot of ‘How?’, ‘Why?’ and ‘What?’ questions, often asking about the names of things and what unfamiliar words mean. They have an understanding of the way that written words relate to spoken words and are taking their first steps towards reading for themselves. They’re often also very interested in writing, and it’s good to play enjoyable games with them that involve writing down letters and words.

**Problem solving, reasoning and numeracy**

Children passing through Step 14 are capable of thinking about how to tackle simple problems, before launching into them. They spend time planning what to do, and this is evident in their play, which becomes more complex and involves objects that are used in a number of different ways.

Number concepts are now firmer, and children begin to understand how number plays an important part in everyday life – for example when using money, cooking or sharing things out. Understanding of time improves, and children often find it easier to wait for short periods of time because they now know what ‘five minutes’ means!
Knowledge and understanding of the world
Children’s ability to find out about the world for themselves increases daily, as they gain more understanding of the ways in which they can investigate and explore. They become more competent at using different approaches and sources for learning for themselves, but still benefit from the help of more able children or adults working with them.

Physical development
As well as developing their running, jumping and climbing skills, for which they need plenty of chances to play on a variety of equipment, children in Step 14 are also improving their skills at doing more intricate things with their hands.

Their emotional maturity and motivation for independence can be fostered by encouragement in self-help skills around hygiene, clothing and feeding. These skills are also important for entry into school and early years settings.

Creative development
Children’s growing capability to plan ahead and think creatively means that they are now able to tackle more complex creative projects, which may take several sessions to complete. These may include, for example, a piece of artwork that they work on from time to time, or a story in pretend play that they return to with siblings or with friends. Making opportunities for these sorts of extended projects, and providing the props and materials that may be needed, will help your child to get the most out of this important part of their life.

Creative play can also be a way in which children are able to express and work through the emotional challenges that they face in their lives, since it is often difficult for children to put these into words. Talking with children about what their creative works mean for them can give you better insight into their concerns and worries.

Moving on
Step 14 is the final Step in this Journal and it sets out a broad range of abilities that children acquire. The purpose of the earlier Steps is to describe and celebrate all the learning and achievement that enables children to reach this point. At the end of this section, you can read the Early Learning Goals from the Early Years Foundation Stage, which are the standard materials used in early years settings to describe development from this point.

### Early Years Foundation Stage Early Learning Goals

#### Personal, social and emotional development

<table>
<thead>
<tr>
<th>Notes</th>
<th>Zero level criteria</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Continue to be interested, excited and motivated to learn</td>
</tr>
<tr>
<td></td>
<td>Be confident to try new activities, initiate ideas and speak in a familiar group</td>
</tr>
<tr>
<td></td>
<td>Maintain attention, concentrate, and sit quietly when appropriate</td>
</tr>
<tr>
<td></td>
<td>Respond to significant experiences, showing a range of feelings when appropriate</td>
</tr>
<tr>
<td></td>
<td>Have a developing awareness of their own needs, views and feelings, and be sensitive to the needs, views and feelings of others</td>
</tr>
<tr>
<td></td>
<td>Have a developing respect for their own cultures and beliefs and those of other people</td>
</tr>
<tr>
<td></td>
<td>Form good relationships with adults and peers</td>
</tr>
<tr>
<td></td>
<td>Work as part of a group or class, taking turns and sharing fairly, understanding that there needs to be agreed values and codes of behaviour for groups of people, including adults and children, to work together harmoniously</td>
</tr>
<tr>
<td></td>
<td>Understand what is right, what is wrong, and why</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Communication, language and literacy</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interact with others, negotiating plans and activities and taking turns in conversation</td>
<td></td>
</tr>
<tr>
<td>Enjoy listening to and using spoken and written language, and readily turn to it in their play and learning</td>
<td></td>
</tr>
<tr>
<td>Sustain attentive listening, responding to what they have heard with relevant comments, questions or action</td>
<td></td>
</tr>
<tr>
<td>Listen with enjoyment, and respond to stories, songs and other music, rhymes and poems and make up their own stories, songs, rhymes and poems</td>
<td></td>
</tr>
<tr>
<td>Extend their vocabulary, exploring the meanings and sounds of new words</td>
<td></td>
</tr>
<tr>
<td>Speak clearly and audibly with confidence and control and show awareness of the listener</td>
<td></td>
</tr>
<tr>
<td>Use language to imagine and recreate roles and experiences</td>
<td></td>
</tr>
<tr>
<td>Use talk to organise, sequence and clarify thinking, ideas, feelings and events</td>
<td></td>
</tr>
<tr>
<td>Hear and say sounds in words in the order in which they occur</td>
<td></td>
</tr>
<tr>
<td>Link sounds to letters, naming and sounding the letters of the alphabet</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Communication, language and literacy</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use their phonic knowledge to write simple regular words and make phonetically plausible attempts at more complex words</td>
<td></td>
</tr>
<tr>
<td>Explore and experiment with sounds, words and texts</td>
<td></td>
</tr>
<tr>
<td>Retell narratives in the correct sequence, drawing on language patterns of stories</td>
<td></td>
</tr>
<tr>
<td>Read a range of familiar and common words and simple sentences independently</td>
<td></td>
</tr>
<tr>
<td>Know that print carries meaning and, in English, is read from left to right and top to bottom</td>
<td></td>
</tr>
<tr>
<td>Show an understanding of the elements of stories, such as main character, sequence of events and openings, and how information can be found in non-fiction texts to answer questions about where, who, why and how</td>
<td></td>
</tr>
<tr>
<td>Use their phonic knowledge to write simple regular words and make phonetically plausible attempts at more complex words</td>
<td></td>
</tr>
<tr>
<td>Attempt writing for different purposes, using features of different forms such as lists, stories and instructions</td>
<td></td>
</tr>
<tr>
<td>Write their own names and other things such as labels and captions, and begin to form simple sentences, sometimes using punctuation</td>
<td></td>
</tr>
<tr>
<td>Use a pencil and hold it effectively to form recognisable letters, most of which are correctly formed</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Problem solving, reasoning and numeracy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Say and use number names in order in familiar contexts</td>
</tr>
<tr>
<td>Count reliably up to ten everyday objects</td>
</tr>
<tr>
<td>Recognise numerals 1 to 9</td>
</tr>
<tr>
<td>Use developing mathematical ideas and methods to solve practical problems</td>
</tr>
<tr>
<td>In practical activities and discussion, begin to use the vocabulary involved in adding and subtracting</td>
</tr>
<tr>
<td>Use language such as ‘more’ or ‘less’ to compare two numbers</td>
</tr>
<tr>
<td>Find one more or one less than a number from one to ten</td>
</tr>
<tr>
<td>Begin to relate addition to combining two groups of objects and subtraction to ‘taking away’</td>
</tr>
<tr>
<td>Use language such as ‘greater’, ‘smaller’, ‘heavier’ or ‘lighter’ to compare quantities</td>
</tr>
<tr>
<td>Talk about, recognise and recreate simple patterns</td>
</tr>
</tbody>
</table>

### Early Years Foundation Stage Early Learning Goals

**Knowledge and understanding of the world**

<table>
<thead>
<tr>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Investigate objects and materials by using all of their senses as appropriate</td>
<td></td>
</tr>
<tr>
<td>Find out about, and identify, some features of living things, objects and events they observe</td>
<td></td>
</tr>
<tr>
<td>Look closely at similarities, differences, patterns and change</td>
<td></td>
</tr>
<tr>
<td>Ask questions about why things happen and how things work</td>
<td></td>
</tr>
<tr>
<td>Build and construct with a wide range of objects, selecting appropriate resources and adapting their work where necessary</td>
<td></td>
</tr>
<tr>
<td>Select the tools and techniques they need to shape, assemble and join materials they are using</td>
<td></td>
</tr>
<tr>
<td>Find out about and identify the uses of everyday technology and use information and communication technology and programmable toys to support their learning</td>
<td></td>
</tr>
<tr>
<td>Find out about past and present events in their own lives, and in those of their families and other people they know</td>
<td></td>
</tr>
</tbody>
</table>

To find out more about EYFS, visit www.standards.dcsf.gov.uk/eyfs
<table>
<thead>
<tr>
<th>Knowledge and understanding of the world continued</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Observe, find out about and identify features in the place they live and the natural world</td>
<td></td>
</tr>
<tr>
<td>Find out about their environment, and talk about those features they like and dislike</td>
<td></td>
</tr>
<tr>
<td>Begin to know about their cultures and beliefs and those of other people</td>
<td></td>
</tr>
</tbody>
</table>

### Early Years Foundation Stage Early Learning Goals

#### Physical development

<table>
<thead>
<tr>
<th>Activity</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Move with confidence, imagination and in safety</td>
<td></td>
</tr>
<tr>
<td>Move with control and coordination</td>
<td></td>
</tr>
<tr>
<td>Travel around, under, over and through balancing and climbing equipment</td>
<td></td>
</tr>
<tr>
<td>Show awareness of space, of themselves and of others</td>
<td></td>
</tr>
<tr>
<td>Recognise the importance of keeping healthy, and those things which contribute to this</td>
<td></td>
</tr>
<tr>
<td>Recognise the changes that happen to their bodies when they are active</td>
<td></td>
</tr>
<tr>
<td>Use a range of small and large equipment</td>
<td></td>
</tr>
<tr>
<td>Handle tools, objects, construction and malleable materials safely and with increasing control</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Creative development</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Respond in a variety of ways to what they see, hear, smell, touch and feel</td>
<td></td>
</tr>
<tr>
<td>Express and communicate their ideas, thoughts and feelings by using a widening range of materials, suitable tools, imaginative and role-play, movement, designing and making, and a variety of songs and musical instruments</td>
<td></td>
</tr>
<tr>
<td>Explore colour, texture, shape, form and space in two or three dimensions</td>
<td></td>
</tr>
<tr>
<td>Recognise and explore how sounds can be changed, sing simple songs from memory, recognise repeated sounds and sound patterns and match movements to music</td>
<td></td>
</tr>
<tr>
<td>Use their imagination in art and design, music, dance, imaginative and role-play and stories</td>
<td></td>
</tr>
</tbody>
</table>
